

Dr Muflic is a **Consultant in Rheumatology**. He works at Ealing Hospital and at Northwick Park Hospital as part of London Northwest University Trust, and privately at Syon Clinic in Brentford, London.

Dr Muflic undertook his undergraduate and postgraduate medical training in Romania, and became a medical Consultant in 2013. In 2020, he moved with his family in UK where he continued to work in the NHS, having extensive training and experience in both countries and various medical setups. He has several publications in peer reviewed journals and presented in over 50 national and international conferences. He also taught at the Medical Faculty in Romania and now he teaches Rheumatology both to Imperial University and Brunel University students. He obtained his competence in the field of musculoskeletal ultrasound in Romania in 2015 and completed also a specialisation course in the field of capillaroscopy in UK.

Dr Muflic runs a dedicated Early inflammatory arthritis at Ealing Hospital and a Bone metabolic clinic at Northwick Park Hospital, with special interest in early autoimmune arthritis patients, but also on patients with bone pathology like osteoporosis.
